Subject - Request to allow the students to conduct workshops for Microsoft student partner Program

We are glad to accept AJMAL BASHEER for Microsoft student partner Program. The Student partner program is designed for technology enthusiasts to learn technology in a fun way through videos, exercises and demos. During this program, students will learn, share, brainstorm and build on ideas together. This course will be staged with 3 different levels of difficulty- Beginner, Intermediate and Advanced level tracks.

With this document, we would request you to allow the student to host workshops for your campus associating with IEDC and CSI on 04/05/20

Thanking you in anticipation
Best regards,

Microsoft Student Partners

Thanking you

Approved

Efficient Enhancement of Hepatic and Splenic Carcinoma in Canine using Image Processing

Pazhankaran Sneha Pauly, Bindhu K Rajan and Sindhu K Rajan

Abstract—Image processing finds application in many fields, especially in the field of biomedical engineering for tumor and cancer detection. Research has been going since a very long time for identification of different types of cancer in humans and the research is still on its path. However, pathologic detection of hepatic and splenic cancer in canine is very costly and diagnosing becomes a tedious task in many cases. So, a cost effective and easier technique has to be developed in order to detect the cancer and start the treatment. Here image processing techniques are made use to pre-process the cancer-causing cells in dogs using ultrasonic (US) images. The proposed system frame work consists of image pre-processing stage where enhancement of the raw image is aimed. Here different image enhancement algorithms are applied, of which the best algorithm is selected based on the evaluation parameters like PSNR, SNR, MSE, RMSE.

Index Terms—Canine, filtering, enhancement, hepatic, segmentation, US image.

I. INTRODUCTION

TUMOR is found to be one of the dreadful diseases in most of the living creatures. Though a great progress has been achieved in cancer detection, it is still considered as one of the challenging studies for many researchers. Cancer is referred to as cells that are abnormal in growth and has the capability to effectively invade other tissues and cells. This abnormal growth in cells become cancerous due to the invasion of defects and mutated components in DNA. Body is affected adversely when these abnormal cells form lumps or tumors due to its uncontrollable division. On growing, these tumors interfere with the normal working of circulatory, nervous and digestive systems thereby releasing hormones that cause changes in body functioning. Tumors are basically differentiated into 2 types- benign and malignant. Benign tumors are those which have restricted motion and tend to stay at one position. Such tumors are basically not harmful. However, when angiogenesis occurs or when invasion of cancerous cells occurs on other cells, tumor formed is called

malignant tumor. Unlike benign tumors, malignant tumors are very dangerous.

Of all cancers, sixth most common malignant tumours is the liver cancer and is one of the top three reasons for cancer-related deaths. Almost 20% of the world population become prey of chronic liver cancer. One of the reasons for fatal is liver cancer. It is also known as Hepatic cancer. The signs of hepatic and splenic carcinoma in dogs are decreased appetite, lethargic, weight loss, abdominal distention, vomiting, mass can be felt in stomach, excessive thirst, frequent thirst, ulcer, jaundice, bloody diarrhoea, hepatic encephalopathy. Major drawback of hepatic cancer is that the diagnosis usually occurs at later stages in the disease. However, diagnosis at these stages will be supported with very less fruitful treatments [1]. This ends up on the verge of their extinction. The expectancy of dog's life is somewhere between few months to few years, once cancer begins to spread. Surprisingly dogs can survive more than 3 years when diagnosed at early stage. Depending upon the information obtained from canine's previous records of illness, laboratory data, physical examination and different imaging techniques of the abdominal area can pave way for an accurate diagnosis of canine hepatic tumours [2]. Moreover, the other factor that helps in hepatic cancer diagnosis is based on the experience of the medical experts. Even if method like biopsy can be made applicable for detection whenever the experts, based on their experience feel the presence of cancer-causing cell, the time a dog can fight against these cells is negligible. Perhaps, all these modes of canine cancer detection are not reliable and successful way of prediction. So, the urge for a trustworthy and cost-effective method is growing at an alarming rate in case of hepatic cancer detection in canine.

In this paper, image processing technique is made use for efficient enhancement of the cancer in canines using Ultra Sonic (US) images. Automatic identification of cancer using US image is a challenging task. Efficient enhancement of canine liver carcinoma is aimed in this paper. Since there are very few works done using image processing for detecting cancer in dogs, procedure used for filtering images in humans is analyzed and made applicable in dogs here. Image pre-processing stage is involved for efficient enhancement of liver carcinoma. The following sections discuss about different pre-processing algorithms.

The rest of the paper is organized as follow: Section II gives a detailed description about the denoising techniques which further includes the subsections that gives an idea about four filtering techniques - Mean, Median, Wiener and Gaussian

Pazhankaran Sneha Pauly, Bindhu K Rajan and Dr. Sindhu K Rajan are with Jyothi Engineering College, Jyothi Hills, Cheruthuruthy, Thrissur, Kerala 679531 (e-mail: snehaspauly1@gmail.com, bindhukrajan02@gmail.com, kraindsindhu@gmail.com).

ORDER

JECC – Management Scholarships - Approval of - Orders Issued.

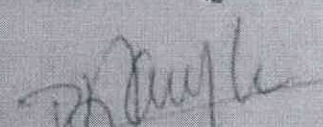

The Management of Jyothi Engineering College, as part of its policy to extend scholarship to meritorious students of our college based on their family income and marks is pleased to grant scholarships to the eligible students admitted in the year 2019-20 and to renew the scholarships granted in respect of the students of previous years

The list of students whose scholarships are granted for the year 2019-20 (Including the renewal of scholarships to previous batches is attached herewith. The students Concerned are directed to meet the Secretary & Assistant Manager and to obtain the details.

Management Scholarship granted.

2019 Batch	-	Rs. 14,41,000.00
2018 Batch	-	Rs. 31,21,200.00
2017 Batch	-	Rs. 17,55,800.00
2016 Batch	-	Rs. 15,09,000.00
2015 Batch	-	Rs. 3,80,125.00
Asthra Jyothi – 2016Batch	-	Rs. 60,000.00
Management Merit Scholarship (KEAM Rank 5001-10000)	-	Rs. 4,25,000.00
Management Merit Scholarship (KEAM Rank 10001-15000)	-	Rs. 6,80,000.00
Management Merit Scholarship (KEAM Rank 15001-20000)	-	Rs. 10,05,000.00
Management Merit Scholarship (KEAM Rank 20001-25000)	-	Rs. 10,20,000.00
Scholarship based on Plus Two marks scored – (90 to 94%)	-	Rs. 70,000.00
Scholarship based on Plus Two marks scored – (95% and above-	-	Rs. 80,000.00

Detailed list of all eligible students are attached herewith.

NBA Accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

EC407 Computer Communication

Question Bank

1. a) Discuss in detail the different attacks in data networks
 - b) Explain the various security services provided on the network?
 - c) Explain the services provided by SSL protocol.
2. a) Explain the various methods used in transport layer to overcome the limitations of the network layer
 - b) With help of diagrams, explain the various scheduling methods to improve the Qos in a network
 - c) Write short notes on (i) SNMP (ii) POP3
3. a) why TCP is called as connection orientated reliable transport layer protocol?
 - b) What are the difference between the services provided by TCP and UDP?
 - c) Explain congestion control measures used in the transport layer.
4. a) Explain the functionality of (i) MIME (ii) SMTP (iii) HTTP
 - b) Explain the handshake protocol used in SSL.
 - c) What is IPsec? Explain the two modes of operation of IPsec
5. a) Explain the services offered by TCP to the processes at the application layer
 - b) With the help of a diagram, explain how users download the E-mail Message using POP3
 - c) Explain the need of the second layer of defence in a secured Network environment.
6. a) Draw the TCP segment header format. Explain the various fields in the TCP
 - b) What are the main features of UDP? Explain.
 - c) Explain the various congestion control mechanisms to alleviate congestion after it happens.
7. a) List the differences between distance vector and link state routing protocols.

NBA Accredited B.Tech Programmes in Computer Science & Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering and Mechanical Engineering valid for the academic years 2016-2022. NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

b) Give any example of distance vector routing algorithm and prepare the routing table for each node.

8. a) what are the problems associated with distance vector protocols. How is it overcome in other routing protocols?

b) How can we distinguish a multicast address in IPv4 addressing? How can we do so in IPv6 addressing?

9. a) Explain how error control is done in the data link layer. Give an example

b) Explain different flow control mechanisms adopted by data link layer

10. a) Write in detail how all the layers in OSI model working together for networking

b) Differentiate circuit switching and packet switching.

11. a) What is meant by data communication and explain the different types of data transmission?

b) Write short notes on types of transmission modes

12. a) What are the Categories of networks? Explain?

b) Write short notes on interconnection of the network with an example

13. a) How the transmission media is classified? Discuss various varieties of twisted pair cable

b) Write the key difference between UTP and STP cables

14. a) Write short notes on co-axial cable and also discuss different co-axial cable connectors.

b) Draw the optical fiber structure and explain the purpose of the core, cladding and buffer coating.

15. a) Explain the stop-and-wait and Go-Back-n techniques of error control ARQ

b) Discuss the various configuration, mode and frame types of HDLC in detail

16. a) Draw the basic structure of circuit switched network and explain the various types of multi path switching with neat diagram?

b) Explain the concept of Time-slot interchange with neat diagram?

17. a) Draw the frame format of CSMA/CA method and Explain?

b) How Collision is avoided in CSMA/CA? Give the suitable techniques (any two)

18.a) What is unguided transmission media and explain the various types of unguided transmission

b) Discuss the advantages and disadvantages of optical fiber cable

19.a) Draw the structure of TCP/IP reference model and explain the five layers function in detail

b) Compare the virtual circuit approach and datagram approach with an example

20.a) Distinguish the stop-and-wait and sliding window for flow control

b) Write short notes on bit stuffing with suitable diagram

21.a) Explain the various types of space-division switching with neat diagram

b) Explain the various types of Time-division switching with neat diagram

22.a) Explain in detail about the access method and frame format of IEEE 802.3 standard network

b) With neat sketch, write the different categories of baseband of IEEE 802.3 standard network

23.a) Draw the architecture of IEEE 802.11 and explain

b) Compare Wireless LAN and IEEE 802.11

24.a) What is the number of bits in an IPv4? Discuss various categories of Classful addressing?

b) Write short notes on various types of notation performing in the networks?

25.a) What is meant by ICMP? Explain the various type of error message occur in the ICMP protocol?

b) Draw the message format of ICMP protocol? Discuss the different types of query message in ICMP Protocol

26.a) List the differences between distance vector and link state routing protocols.

b) Prepare a routing table for each node using the distance vector algorithm and find out which is a least cost route to send the packets A to D?

NBA accredited B.Tech Programme in Civil Engineering valid for the academic years 2019-2022.

27.a) Prepare a routing table for each node using the distance vector algorithm and find out which is a least cost route to send the packets C to D?

b) Draw the flow chart of Dijkstra's algorithm? Write the procedure for implementation of Dijkstra's algorithm and give the suitable example

28.a) How to connected if one of the organizations is not geographically close to the other three? Give the example

b) Why we are going to address aggregation method? Explain in detail and Give the suitable example

29.a) Define hop? Explain the Next-Hop Method Versus Route Method with a suitable example?

b) Compare the concept of Network-Specific Method Versus Host-Specific Method and default method with an example?

30.a) How ARP used for in networking? explain the working operation of ARP protocol

b) Differentiate four Different Cases using ARP protocol with neat diagram?

University Question Papers

D

G192070

Pages: 2

Reg No.:

Name:

APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY
SEVENTH SEMESTER B.TECH DEGREE EXAMINATION (R&S), DECEMBER 2019

Course Code: EC407

Course Name: COMPUTER COMMUNICATION

Max. Marks: 100

Duration: 3 Hours

PART A

Answer any two full questions, each carries 15 marks.

- | | | Marks |
|---|--|-------|
| 1 | a) With a suitable diagram explain the fundamentals of OSI model. | (10) |
| | b) Explain about byte stuffing with example. | (5) |
| 2 | a) Explain the frame format in HDLC protocol. | (8) |
| | b) Explain about TCP/IP protocol suite. | (7) |
| 3 | a) Explain about simplex, half duplex and full duplex communication. | (3) |
| | b) Explain how collision is handled in CSMA/CD. | (8) |
| | c) Compare circuit switching and packet switching. | (4) |

PART B

Answer any two full questions, each carries 15 marks.

- | | | |
|---|--|-----|
| 4 | a) Explain about ICMP. How is error reporting possible in ICMP. | (8) |
| | b) Explain the forwarding of packet in network layer. | (7) |
| 5 | a) Explain subnetting and super netting. How do the subnet mask and supernet mask differ from a default mask in classful addressing? | (8) |
| | b) Explain Link State Routing using Dijkstras algorithm with an example. | (7) |
| 6 | a) What is VLAN? Explain its configurations. | (8) |
| | b) Explain Routing Information Protocol with an example. | (7) |

PART C

Answer any two full questions, each carries 20 marks.

- | | | |
|---|---|------|
| 7 | a) Explain about open loop and closed loop congestion control mechanisms. | (10) |
| | b) Write note on (a) PGP (b) TLS | (6) |
| | c) Explain about firewall and its types. | (4) |
| 8 | a) With necessary diagram explain the features of UDP. | (8) |
| | b) Explain the various intrusion detection systems. | (6) |
| | c) Explain the TCP segment format. | (6) |

Page 1 of 2

D

G192070

Pages: 2

- | | | |
|---|--|-----|
| 9 | a) Explain any four common attacks in networks. | (8) |
| | b) Explain how Telnet establishes connection to a remote system. | (6) |
| | c) Explain about IPsec and its modes. | (6) |

Parents communication

Jyothi Engineering College, Cheruthuruthy Department of Electronics and Communication Engineering(B)

Attendance & Progress Report

Date: 10-10-2019

Dear Sir/Madam,

The attendance and progress of your ward Mr. VISHNU V studying in S7 BTech in Electronics and Communication Engineering(B) is noted below.

The Marks obtained in First Sessional

Sub Code	Subject Name	Marks Obtained (out of)	Class Average	Attendance%	Remarks
EC 403	MICROWAVE & RADAR ENGINEERING	7 (50)	27.63	76.92	Failed
EC 405	OPTICAL COMMUNICATION	24 (50)	29.42	84	Failed
EC 407	COMPUTER COMMUNICATION	18 (50)	30.1	86.36	Failed
EC 409	CONTROL SYSTEMS	11 (50)	33.97	81.48	Failed
EC 469	OPTOELECTRONIC DEVICES	16 (50)	32.33	70.59	Failed
EC401	INFORMATION THEORY & CODING	16 (50)	37.52	83.87	Failed

The general progress of your ward is : Excellent / Good / Average / Poor

Empty box for general progress
